Reciprocating & Linear Compressor

Compressor Technology **for Refrigerator**

Частное предприятие "Юдилен-Холод" || +375296803378 || https://купизапчасть.бел || Минская обл., Минский р-н, Щомыслицкий с/с, 92/4

Why LG Compressor?

Technology

LG compressors are continuously evolving group of high-precision machining and assembly technologies from accumulated techniques for generating sustainable world best compressor. Especially we are enabling to give our customers technical support in order to provide best performance compressor through design mechanism and produce key technology of compressor, inverter motor and drive that makes you to achieve optimized product.

Model Variety

In order to offer you a various product portfolio of refrigerator compressor, our range covers constant and inverter of Reciprocating and Linear compressor with low pressure as well as high pressure. It enables to provide you with full support in all application of your needs.

Quality

With the product quality and safety evaluation system that performs basic quality and safety evaluation for products at every production stage. Under the quality gate system, all our products undergo a safety check at each quality gate based on a checklist, preventing shipments of products with quality or safety issues. We also have achieved recognition our quality and sustainability from Europe, North America, China and Japan.

Customer Support

LG compressors promise to deliver a satisfaction level for all your business stage from research, development to the spec-in that exceeds our customers expectations, and strives to provide the highest value to our customers through a fast, accurate and differentiated service & solution as your business partner.

Brief History & Factory

Milestones & Production Sites

1963
Motor Production

1973
Refrigerator Compressor Production

1990
Air-conditioner Compressor Production

2006
Unification of Motor & Compressor Division

2008
Compressor Sales 100 Million Units

2011
Establishment of C&M Business Unit

BCA

単位 : mm

Specification _ Controller

Controller

Contents	Detail
Rated input power	220~240 Vac
Maximum input current	3.0A
Maximum input power	260W
Operating compressor Hz	20~75Hz
Compressor connection color	Black(U)/Blue(V)/Yellow(W)
Ambient operating temperature	-5~43°C
Storage temperature	-25~85°C
Max. storage relative humidity	85%

Noise Filter

Contents	Detail
Inductance	4A, 26mH

Reactor

Contents	Detail
Inductance	0.8mH
Wire diameter	0.8mm
Maximum input current	5A
